 WISDOM INDUSTRIES Merino, CO 80741	APPROVED BY:		
	DESCRIPTION: HANDLE BAR MODIFICATION	SCALE:	NTS
DRAWN BY: SIZZLER	DATE:	JAN 8 - 06	
	DRAWN BY: M. HOPMAN	DRAWING NUMBER:	FB MOD

**SIZZLER
LAP BAR & SEAT LOCK INSPECTION PROCEDURE**

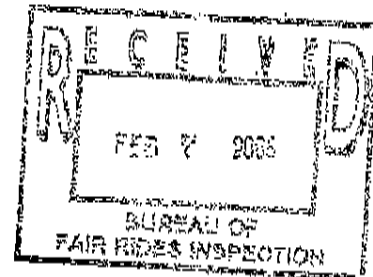

1. Raise lap bar and latch.
2. Check lap bar hinge bolts and pipe for wear or looseness.
3. Check lap bar arm for cracks.
4. Check that seat lock brass is tight.
5. Open lap bar.
6. Push seat lock pin. It must snap back out and not drag or catch.
7. Close lap bar. Seat lock pin must snap into the notch in the brass.
3/8" minimum engagement of pin in brass.

➤ **NOTE: ELECTRIC SEAT UNLOCKING IS NOT MANDATORY.**

8. Activate electric unlocking system.
NOTE: All seat locks should release.
9. Turn off electric unlocking system.
NOTE: The timer will shut off the solenoids after about 15 seconds.
10. Go around seat to inside (spindle side) and pull on the lap bar sideways and out to try to pop seat lock pin out of the brass.
11. If bar comes open, tie off that car until repairs are made. Replace any components needed if the bar will come open.
12. Repeat for each seat.

****WARNING****

Never install a bolt or knob to manually unlock the lapbar.
Passengers have been known to open the bar while the ride is running and come out of the seat.
