Amusements, Inc.

December 18, 2009

To: Whom It May Concern,

Re: Far Fabbri Amusement Rides,

Sub: Annual Bolt Inspection,

Fabbri Amusements, Inc is the North American representative for Far Fabbri S.r.l.

As prescribed in the Maintenance Manual, the manufacturer requires an annual test of specified fasteners used in the assembly the ride for each installation. This test calls for an Ultrasound or X-ray of the fasteners, and to replace any that show signs of cracks or fatigue.

Due to the difficulty at times to perform the ultrasound or X-ray test, they will accept a Wet Magnetic Particle test. All fasteners are still required to be inspected on an annual basis, and the test certificate will become part of any routine inspection.

Please feel free to contact our office if you have any questions.

Respectfully,

A handwritten signature in black ink, appearing to read 'Jeff Miller', with a stylized flourish at the end.

Jeff Miller
